Audience with Individuals. – None

Discussion: - FEMA Primary information on the effect of natural disasters.

The first major flood in Mills County was in 2007.

PCT #1 had tree debris on roads. Commissioner Wright stated they did not weigh the debris in roads but took photos, estimated cost of work would be \$10,000.00 including labor and machinery no contract labor was done, all labor was done by county employees. Low water crossings were shut down for three or more days. Road material was brought into patch holes in order for the public to pass. CR 308 has been shut down for nearly a month – it is now open with only temporary fixes. CR 306 permanent tin horns were added in for drainage. CR 327 low water crossing, had to have emergency repairs done.

PCT #3 Commissioner Partin stated the percentage of work completed on the CR 508 bridge would be 75%. The estimated total cost would be between \$5,000.00 and \$10,000.00. CR 508 had a bridge completely clogged and water was not flowing under bridge, which called for an emergency repair.

PCT #2 Commissioner Head stated they had several trees were down, they were cut and moved out of roadway into ditches – most of the debris went down to creek. Estimated percentage of completion 75%. Labor used to complete the work was not contracted out. Emergency protective measures were taken on CR 333, a vehicle was stuck in the ditch due to trees and debris. The cost of temporary work done to CR 333 was approximately \$2,000.00.

PCT #4 – Not present – Judge Johnson read from the worksheet completed by Commissioner Williams.
